We work across every department, area, and shift at BlueOval SK and we will be voting “Union Yes!” on August 26 and 27. We are excited for you to join us.

We are proudly building the batteries of the future car industry. We are dedicated to our work and are committed to the success of the company. But we also know the value of having a voice at work.

We know that without a union, our job security, policy structure, and health and safety is completely in BOSK’s hands. With a union, that power changes, and we collectively negotiate as equals and vote for a contract with real clarity and transparency about the policies that impact our personal lives.

We can do better as a company and as a community. By coming together at BOSK and joining tens of thousands of auto workers across the USA, we can negotiate for numerous improvements to enhance the quality of our jobs and our overall quality of life.

We look forward to negotiating to strengthen the future of the company. Let’s get this done.
